

Support regional human rights mechanisms

Proposal by Joshua Cooper, Hawai'i Institute for Human Rights

Support regional human rights mechanisms to promote and protect human rights in existing regional commissions and courts to create culture of human rights and prevents conflict and violence by ensuring situations don't rise to end peace

Where no regional human rights mechanism exists that we support the creation of unique models

Promote human rights and peace together at national level with National Human Rights Institutions as well as Human Rights Cities models if don't exist to ensure culture of peace
